

Regulatory & Compliance Communication

Turn regulatory communications into **intuitive digital touchpoints**

We transform complex legal documents into trusted, secure and fully compliant communication journeys.

Our Approach

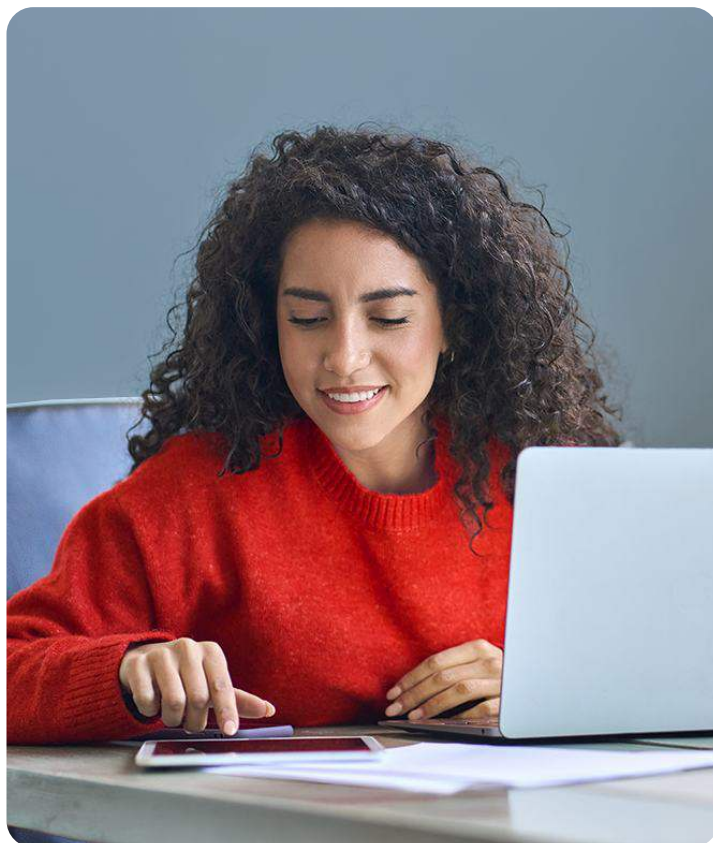

A fundamentally different approach to **enhanced compliance communication**

At Tilt, we don't sell software, compliance templates, or standalone tools. We deliver a fully managed, data-to-delivery compliance communication service within our secure cloud environment.

You simply pass us raw compliance data streams and legal requirements. Our expert team and cloud environment takes care of the rest: automatically generating legally compliant documents, formatted for maximum clarity, orchestrated across secure delivery channels, with full tracking of behavioral engagement.

Our managed service acts as a seamless extension of your core systems, handling your heaviest compliance burdens without requiring a complex, high-risk rip-and-replace of your IT infrastructure.

The Opportunity

Compliance communication is an **opportunity to build trust**

Reduce friction and build trust by transforming heavy regulatory documentation into clear, accessible and secure digital experiences.

- **Improve compliance execution** by ensuring regulatory updates are consistently and flawlessly delivered across all channels, at scale.
- **Strengthen audit readiness** through the secure instantaneous retrieval and tracking of historical outbound communications.
- **Enhance legal certainty** with auditable delivery confirmations and engagement-based proof of interaction, across your operations.
- **Support customer understanding** by structuring complex and intimidating legal language into clear, structured and accessible summaries.

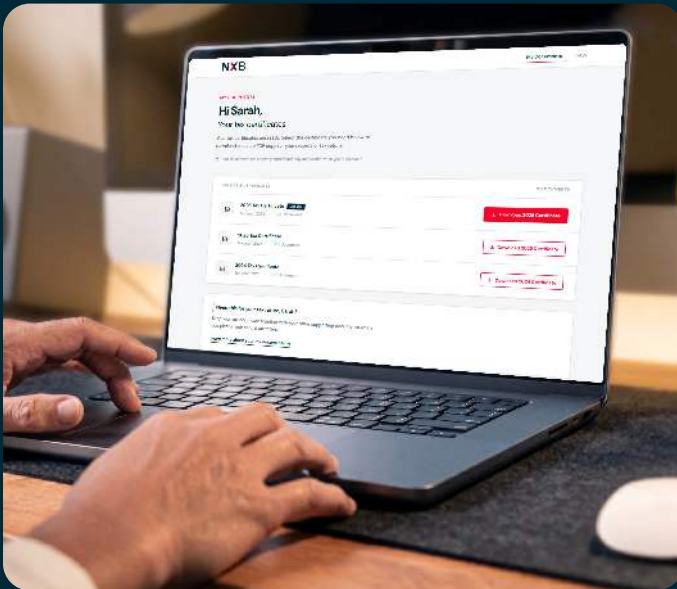

Key Solution Capabilities

Secure, automated pipeline for **high-stakes regulatory output**

- **Managed compliance formatting**
Translating raw legal and systemic inputs into clearly structured, professional, mobile-optimised communication outputs.
- **Automated data-to-template mapping**
We handle the complex mapping of your raw backend data streams directly into your pre-approved, compliant document templates, ensuring 100% data accuracy at scale.
- **Secure omnichannel delivery**
Ensuring critical notices are sent via highly secure digital channels, featuring automated fallback across messaging platforms to maximise delivery.
- **Full delivery auditing & behavioural insights**
Providing comprehensive logs of every document generated, sent and received with critical behavioural data showing how your customers interacted with their documents (opens, clicks, and engagement time).

Communications We Manage

Compliance communications, **secure & fully managed**

We handle the end-to-end generation, secure dispatch, and audit tracking for your highly regulated communication portfolio.

Financial & Tax Disclosures:

- Tax Statements & Certificates
- Withholding Tax Notifications
- Statutory Financial Disclosures

Mandatory Legal & Privacy Alerts:

- Updated Terms & Conditions
- Privacy Policy Updates
- Data Breach Notifications

Operational & Legal Updates:

- Claims-Related Legal Notifications
- KYC Verification Requests
- Regulatory Policy Adjustments

Use Cases

Turn compliance into **clarity and confidence**

Statutory declarations & disclosures

We ingest heavy batch files to produce and distribute millions of personalised, highly accurate tax certificates, statements, and financial disclosures seamlessly.

Regulatory updates & mandates

We design and deploy clear, accessible communications that translate complex statutory updates and regulatory disclosures into easily understood formats - boosting customer compliance, protecting brand trust, and drastically reducing inbound calls.

Business Outcomes

De-risk critical **regulatory communications**

Deploy a robust system of record that turns mandatory operational burdens into measurable strategic advantages.

01 Strengthen compliance confidence

Protect your brand against regulatory penalties with a highly auditable, consistent, and robust communication delivery service for all regulatory and compliance communications.

02 Eliminate operational burden

Completely automating compliance workflows, batch distribution and high risk manual data handling.

03 Turn compliance into trust

Reducing contact centre strain by presenting regulatory information that is clear, transparent and easily digestible by your customers.

Why Partner With Us

Tilte enables organisations to transform compliance communication into structured, secure and fully auditable digital journeys.

By orchestrating regulated data, communication workflows and delivery assurance, Tilte strengthens trust, reduces operational risk and improves clarity across all regulatory touchpoints.

Ready to streamline your regulatory communication without the **burden of managing complex software?**
